## CeutiCare, LLC is a Collaborative Medication Therapy Management (CMTM) Company

CeutiCare engages with an acute care provider (hospital/health system) to provide C-MTM services to its primary care network. We locate pharmacists on-site at a physician's office that is affiliated with or supported by an acute care provider to improve the health of chronic care patients such as diabetics, and reduce the overall cost of treatment. CeutiCare can also contract directly with physicians when appropriate and desired by the physician.

**CeutiCare benefits physicians by placing pharmacists in their offices.  
Patients will also benefit from having access to a pharmacist.**

### Physician Benefits Through CeutiCare:

- \* A CeutiCare pharmacist becomes part of the physician's team
  - Negotiates prior approvals and formularies
  - Electronically prepares prescriptions for physician signature
- \* CeutiCare pharmacists spend the extra time with patients that physicians do not have
- \* CeutiCare pharmacists help configure primary care practice to be consistent with the MEDICAL HOME MODEL or PATIENT CENTERED MEDICAL HOME
- \* CeutiCare helps increase reimbursement to the primary care site
- \* CeutiCare tracks and reports patient outcomes to accelerate reimbursement

### CeutiCare contributes to:

- \* Practice Management
- \* Health Information Technology
- \* Quality and Safety
- \* Practice-Based Team Care
- \* Continuity of Care
- \* Care Management
- \* Access to Care and Information

**Contact CeutiCare today for more information or to request an on-site pharmacist!**
